**NOTE:** ENSURE SCORPION SYSTEM IS CLEAR OF MOVING PARTS AND ALL ORIGINAL FUNCTIONS WORK CORRECTLY.

Car	Audi S3 8V Saloon	Part No.	SAU098CF
Year	2013-2020	Fit Kits	395FK
Notes	Where not supplied use original fittings	Features	Pipe Diameter:- 80mm

A) After you have removed O.E exhaust you will need to swap the valve motors to the Scorpion exhaust. Remove the 3 nuts (keep safe as you will need them to bolt the electronic valve motor to Scorpion Exhaust).

B) Lift up the motor. You will now be able to see the torsion spring (This must stay on the electronic valve motor to work with Scorpion Exhaust).
C) Rotate Scorpion valve so it aligns with the torsion spring.
D) Now fit the O.E electronic valve motor ensuring the spring seats correctly to the lugs of the valve.

E) Using the 3 O.E nuts secure in place.

F) Both of the rear mounting points need rotating 180° when fitting the Scorpion exhaust.

Once happy with fitment of Scorpion Exhaust, fully tighten up all clamps and fixing and plug in the electronic valve motors.
